

Commercial Dishwasher Daily Maintenance Log

Max Appliance Ottawa - Restaurant Owner Guide 2026

Every Shift

1 Check wash and rinse temps

Confirm the sanitising rinse holds its target and log the reading.

2 Confirm chemical levels

Verify detergent and rinse-aid are drawing at the set concentration.

3 Load racks correctly

No nesting, no stacking, no overpacking that blocks spray coverage.

Close-Down

1 Delime and clean jets

Clear scale from spray arms and jets, more often in hard water.

2 Clean the filters

Empty and rinse the wash-tank filters and scrap trays.

3 Initial the log

A named person signs off so accountability is real, not a poster.
